

Certificate for freezing and use of frozen semen in private semen banks

If the semen is sent for storage elsewhere in Norway, the certificate must follow the semen.

Please note that when exporting semen abroad, more supplementary certificates may be required.

In order for puppies to be registered in the Norwegian Kennel Klub (NKK) after using this semen, the lower part of the certificate must also be completed and the certificate must be enclosed with registration of the litter (by mail or electronically). The top part of the form may be a copy of the original; the lower part is filled in when the bitch is inseminated. The parent animals must be of the same breed, registered in the NKK or an FCI-approved foreign register and have fulfilled any additional requirements specific for the breed.

Information about the male dog at semen collection and freezing of the semen

Information provided by the owner of the (male) dog

Breed	Dog's registered name		
Date of birth	Reg. #	ID-chip	
Owner		E-mail	
Owner's Address			Phone

To be filled out by the person collecting and freezing of the semen

Have you controlled the dog's registration certificate and ID-chip number and can confirm the dog's identity? Yes No
